

Find a room that *fits*.

The colour and type roomfit uses, taken from the live app at app.joinroomfit.com. Use the values exactly as given. Page 3 covers the few rules that are easy to get wrong, and page 4 has everything as CSS to paste.

GROUND AND TEXT

 paper #F4F1E5 Page background. Everything sits on it.	 surface #F1ECDB Inputs, the empty photo slot, small tags.	 card #FFFFFF Cards and panels. Always pure white.	 line #E3DECB Hairlines: borders, dividers, bar tracks. Decorative. 1.19:1 on paper
 ink #191C1A Main text and headings. 15.2:1 paper • 17.2:1 card	 ink-soft #646D66 Secondary text: ledes, hints, reasons, meta. 4.73 paper • 5.36 card • 4.53 surface	 accent #2F6F4E The one brand colour, pine. Buttons, links, the icon. 5.3:1 paper • 6.0:1 card	 accent-ink #FFFFFF Text on a pine fill, such as a button. 6.0:1 on accent

SCORE RAMP • MEANING ONLY, NEVER DECORATION

 fit-high #2F6F4E Good fit, 75% and up. Same value as accent on purpose. 6.0:1 on card	 fit-mid #C08A2E Middling fit, 50–74%. On white cards only. 3.04:1 card • 2.68:1 paper ×	 fit-low #A8564A Poor fit, under 50%. Not an error colour. 5.1:1 on card

Rules

The values are only half of it. These are the decisions that keep roomfit looking like itself.

- **One serif moment.** EB Garamond sets the headline and the wordmark only. It comes apart below about 28px, so every smaller heading is Plus Jakarta Sans 700.
- **One italic word.** Italicise the word a headline turns on: "Find a room that *fits*." Load the real italic; don't let the browser fake it.
- **Cream page, white cards.** Anything showing a room, a score or a form sits on a pure white card on the cream page.
- **One brand colour.** Pine (accent) for buttons, links, the eyebrow and the icon. Don't add a second hue.
- **Score colours mean a score.** Green, amber and clay show how well a room fits. Never use them as decoration, or as success, warning or error.
- **Amber stays on white.** `fit-mid` is 3.04:1 on a card and 2.68:1 on cream, where it blends in.
- **Secondary text is ink-soft.** It holds 4.5:1 on all three grounds; don't lighten it.
- **Hairlines are decoration.** Line is too faint to mark a control on its own; fields also get the `surface` fill.
- **The name is lowercase.** Write `roomfit`, one word. It's set in type; there is no drawn logotype.
- **Voice.** Short, plain, second person. No emoji or exclamation marks. Say "receipt" for the score breakdown.

SAMPLE • THE FIT RECEIPT

Always five factors, 20 points each. Each bar takes the ramp colour of its own ratio; the ring takes the total's.

SHAPE AND DEPTH

radius • 14px

Cards, panels, notices, inbox rows, sheet tops.

radius-sm • 10px

Inputs, buttons, tabs, photos in cards.

Find my fit

Sample listing

shadow • pad 16px

One barely-there shadow (values on page 4); the white card on cream does the lifting. 16px card padding and page gutter.

App icon. A white house with one pine window on a pine square, 14-unit corners on a 64 box. Two fixed inks; don't recolour it or put words in it. No icon library: the UI uses a few text glyphs (♥ ♥ × ↓). No illustrations or stock people; the images are the rooms.

Tokens, ready to paste

The same values as the app's stylesheet. Load the fonts with the link below, then use these custom properties rather than typing hex values.
